Algorithmic Odyssey

Navigating the Frontiers of Digital Possibility

BLUEBELLS SCHOOL INTERNATIONAL

BLUEBELLS SCHOOL INTERNATIONAL

Sir/Ma'am,

Greetings from Team Eniac!

It is our immense pleasure to invite you to **Virus 2025**, the annual inter-school Tech Extravaganza, organized by the **ENIAC Club** of Bluebells School International, New Delhi.
On **10th November 2025**, we bring to you the ultimate celebration of innovation, creativity, and technological prowess — a fest that celebrates your skills in this ever-evolving digital world.

ENIAC, the computer club at Bluebells School International, is a completely student-led initiative guided by dedicated mentors. While ENIAC originally stands for Electronic Numerical Integrator and Calculator, for our students it represents something greater —Encoding, Networking, Innovating, Achieving, and Computing— a true embodiment of their passion for technology and discovery.

Since its inception in **2001**, the ENIAC Club has successfully organized its annual IT fest - **VIRUS**, which continues to thrive thanks to the enthusiastic participation and spirit of competing teams from across schools.

This year's theme, **"Algorithmic Odyssey: Navigating the Frontiers of Digital Possibility,"** invites you on a journey through numbers, codes, software, games, and captured moments — all intertwined with the essence of history. Explore the elegance of algorithms and the depth of digital imagination.Because this time, **every glitch connects minds and machines.**

Welcome to Virus'25

Best Wishes and Good luck
Team Eniac

President
Eniac Club

GENERAL GUIDELINES

- The following events will take place **Online:**
  Meme-o-Mania, Educraft and Armageddon
- The following events will be held in **Hybrid** Mode:
  Click Clash, Code Quest and Brainstorm.
  (Prelims/Submission: Online, Mains: Offline)
- Schools are requested to confirm the details of their participation through the registration forms provided on each event page.
- The registrations will close on **4th November, 2025**
- **To be eligible for the Rolling Trophy, it is mandatory for the school to enroll in atleast 3 of the events (including atleast 1 offline event).**
- An additional **10 bonus points** will be awarded to schools that participate in **ALL Offline** events.
- To ensure the smooth running of the event, we kindly request all participants and guests to arrive promptly at the venue by **8:30 a.m**. It is important to note that schools arriving late will not be granted any additional time.

For any furthur queries, email us at:
eniac.virus25@gmail.com

GENERAL INSTRUCTIONS

- In the beginning of the competition each team will be allotted three topics in a random manner on which they would have to design a meme.
- The topics will be assigned to the participating teams on Discord.
- Each team will receive three topics and must create one meme for each. That's a total of three memes to submit!
- On the day of the event, a zoom meeting will be organised to explain rules and submission methods. The link of which will be provided on discord.
- Each team will be given a school code, which they will write in the submission form.
- Each team will get 6 hours in total for creating and submitting the memes.
- Submissions links will be provided on discord.
- Each meme would be marked out of a total of 10 points and the cumulative sum of all the points will be the final score. The team with the highest total score will win.

Judgement criteria:

- Humour and entertaining elements
- Choice of template/formatting
- Relevance to the topic given
- Creativity and Imagination

Non-fulfillment of the following criteria will lead to mark penalties:

- Too much text
- Unoriginal /plagiarism
- Offensive content

PLEASE NOTE:

Mode: Online

Number of participants per school: 1

Eligibility: VI-VIII

MINECRAFT
EDUCATION EDITION

GENERAL INSTRUCTIONS

- Participation is individual only; team entries will not be accepted.
- The official platform for the event is Minecraft: Education Edition. Use of any other software, modifications, or third-party plugins are strictly prohibited. All builds must be created in a flat world
- All submissions must be entirely original; templates, schematics, texture packs and pre-built structures are not permitted.
- Command blocks and builder commands should be used where applicable (for example, to enable automation, interactive elements, or simulations).

MAINS

- The Theme for the event is: **Technology Laboratory**
- Participants must design a futuristic or present-day laboratory based on technology. The interpretation is open, but the lab should clearly represent a space where scientific or technological research occurs.

1. Augmentation Lab – A research and development space dedicated to creating technologies that enhance human capabilities
2. AI & Robotics Lab –A research space where machines are designed to think, learn, and act intelligently..
3. Quantum Computing Lab –A laboratory focused on next-generation processors and the science of quantum information.
4. Space Technology Lab – A facility where ideas for interplanetary travel and cosmic research take shape.
5. Genetic Engineering Lab – A Research Unit where science meets life
6. Cybersecurity/Virtual Reality Lab – A center examining the boundaries of reality, simulation, and information integrity.
7. Green Tech Lab – A hub for advancing clean energy, recycling systems, and sustainable development methods.

- **Innovative or alternative lab concepts, beyond those specified, are acceptable.**

Build Specifications

- **Build Area Size:**
  Minimum: 100 x 100 blocks
  Maximum: 200 x 200 blocks
- **Mandatory Build Components that must be included in all labs:**

1. Main Laboratory Building (central hub)
2. Experiment Chambers – containment rooms, testing zones, or augmentation pods.
3. Energy / Power Source – fusion core, solar array, reactor, or similar energy systems.
4. Research Pods / Stations – specialized units dedicated to different technologies or fields of study.
5. Safety & Security Features – decontamination chambers, quarantine zones, security bots, and related systems.

Submission Guidelines

Participants must submit two files :

- Educraft World File copy
- Video Presentation :
  Duration: 3-5 minutes
  The video must showcase the lab design, either as a Gameplay walkthrough, Fly-through / creative camera recording or explanation of features, mechanisms, or design highlights.
  Narration or captions are recommended to explain the concept.

Submission Method:

- Upload both files to given google drive link by **6th November 2025**. The Google drive link will be provided to participants through email and discord.
- Kindly ensure that the educraft world loads correctly and the video plays without errors.

VALORANT & FALL GUYS

GENERAL INSTRUCTIONS

Team Formation

- Each school can register 1 Team of 4 Players.

Points System for Valorant

- Winning team - 10 points
- Winning under 18 rounds - 5 points
- Ace of a teammate - 5 points
- Flawless round - 4 points
- Winning a round - 2 points

Round 1

- 6 standard Fall Guys matches will be conducted in Round 1. Each team can nominate 2 players to participate in this round. The winner of each match will qualify for Round 2.

Round 2

- The qualified teams will compete in a standard valorant match. Points will be awarded to the teams as per their performance in the game. The top 3 teams will qualify for Round 3.

Round 3

- The teams that secure 2nd and 3rd positions in Round 2 will face off in a team deathmatch, with the winner advancing to the finals.

Finals

- The top two teams will compete in a standard match for 1st position.

Tie-Breakers

- In case of a tie in total points between two or more teams, an extra tie-breaker mini game will be played in fall guys to decide the winner.

Code of Conduct

- Strictly no toxicity, offensive, or abusive language will be tolerated.
- Any violation may lead to warnings, penalties, or disqualification at the organizers' discretion.

HACKERRANK

GENERAL INSTRUCTIONS

- This competition is open to participants of classes 9th - 12th who have an understanding of the Python programming language and SQL.
- The participants must have an account on Hackerrank. The Hackerrank ID needs to be submitted during registration. Each team should register through one person who will be the team leader.
- Any form of plagiarism or cheating will result in immediate disqualification. Participants are not allowed to use any search engine or AI.
- In case of a tie in score, the participant who submitted their solutions first will be ranked higher. If the time taken by both groups is the same, the solution that is more efficient will be given a higher rank.
- Any disputes or issues related to the competition should be communicated to the competition organizers through the designated communication channel on Hackerrank or email.

PRELIMS

- Participants will be provided with a form containing 20 questions focused on basic programming concepts in Python and SQL.
- The time limit for the preliminary round is 45 minutes.
- Based on performance, the top 5 teams will qualify for the final round, which will be conducted offline at the host school.
- Please note that test scores are final and cannot be contested.
- The use of any external applications, tools, or assistance during the test is strictly prohibited and will result in immediate disqualification.

MAINS

- The participants will be given 8 questions for the finals with a time limit of 2 hours.
- Solutions will be tested against multiple test cases, including both sample cases and hidden test cases. Participants will not have access to the test cases or their specific inputs and outputs.
- Each problem will have a predefined score assigned to it. The score will depend on the difficulty level and the number of participants successfully solving the problem using Python. The final score of a participant will be the sum of the scores of all the solved problems.
- A live leaderboard will be available during the competition to track the scores and rankings of participants in real-time. The leaderboard will not be the final ranking of the competition.

GENERAL INSTRUCTIONS

- Each photograph must be submitted with an appropriate caption.
- The participant must be the sole author and copyright holder of all submitted photographs.
- Only basic editing is permitted, including minor adjustments. Cropping is allowed up to a maximum of 20% of the original image.
- **Use of any Photo editing application to modify or alter the original picture will lead to disqualification.**

PRELIMS

- The PRELIMS will be conducted **online**.
- There is no specific theme for the prelims. Participants are allowed to be as creative as possible.
- Each participant is allowed to submit **only two** photographs.
- Images must be submitted in Windows PC-compatible JPEG format. Images must be ideally full-size without borders, watermarks, or signatures.
- The submitted photographs must be clicked between **10th October 2025 – 6th November 2025**.
- Meta data of the photographs must be provided with the entry.
- The submitted photographs must be named as "**SchoolsName_ClickClashP_ParticipantName_(1)**" and "**SchoolsName_ClickClashP_ParticipantName_(2)**".
- All entries must be submitted via email at: **eniac.virus25@gmail.com**
- The last date for submission is **6th November 2025, Thursday**.
- Judging will be done on the basis of Originality, Creativity, Technical Quality and Composition.
- 10 schools will be shortlisted by the judges, moving on to the final round.
- The Result for the prelims will be declared on **7th November 2025**.

MAINS

- The FINALS will be held offline in the school premises on **10th November, Monday**.
- The theme for FINALS will be revealed in the school itself.
- **90 minutes** will be provided to capture the photograph. The submitted photograph must be clicked within this time limit.
- Participants will be given a prompt and their photograph has to reflect that theme or idea.
- Only basic editing is allowed (maximum cropping of up to 20%). Use of any Photo editing application to modify or alter the original picture will lead to disqualification.
- Images must be submitted in Windows PC-compatible JPEG format. Files must be ideally full-size without borders, watermarks, or signatures. Everybody to carry the cable for connecting the device to the PC.
- Meta data of the photograph must be provided with the entry.
- The submitted photograph must be named as **"SchoolsName_ClickClashF_ParticipantName"**
- Judging will be done on the basis of Originality, Creativity, Technical Quality and Composition.
- The Result will be declared in the award ceremony on the same date

SOFTWARE

ANY OPEN SOURCE SOFTWARE

GENERAL INSTRUCTIONS

- Each team is required to submit given deliverables by **6th November 2025 Thursday**.
- The finals will be held offline in the school premises, giving a chance to all participants to present their ideas to the judges.

SUBMISSIONS

1.Presentation: Prepare a presentation of not more than 6-8 slides (excluding intro and thankyou slide) that summarizes your project's key points. This can be a slide deck or a video presentation, including the following:

- Problem Statement: Provide a detailed description of the problem you're addressing. Explain its significance, scope, and any challenges it presents. Include any relevant data sources/datasets. (Problem statement should be centered around one of the SDGs)
- Market analysis and Feasibility study: Provide a brief market analysis demonstrating the demand for your AI solution and a feasibility assessment highlighting the technical and economic viability of your project.
- Methodology and Algorithms: Describe the AI techniques, algorithms, and methodologies you've employed. Explain why you chose these methods and how they're suitable for solving the problem.
- Scalability and Deployment: Explain how your AI solution can be scaled for larger real-world applications. Discuss deployment strategies and any cloud services used.
- Results and Analysis: Present the results of your AI solution.

2. Website/App: Provide a link to the website/app where your AI solution can be accessed and reviewed along with a well documented and organized code repository.

3.Submission:

- Participants must include their website link in the PPT.
- Participants must upload the PPT in .pptx format on the Google drive link by **6th November 2025**. The Google drive link for uploading of files will be shared by the event coordinators via email.

MAINS

- **Pitch Presentation:** Participants shall use the same presentation and website/app to introduce their solution to the judges and illustrate their ideas.
- Each team will be given 8 mins for their final presentation following which will be a cross questioning round with the judges.
- They can bring models/props related to their solution. The host school will not be responsible for any damage or loss.
- **Plagiarism will lead to disqualification.**

EVALUATION CRITERIA

- Innovation: Is the project unique and/or innovative?
- Quality of Presentation: Is this concept concisely and clearly explained? Are the appropriate analytical methods used and are the insights derived correctly?
- Potential: Do the analysis results have the potential to make a difference?
- Sustainability: What is the social Impact?
- Teamwork: Was the experience a collaborative endeavour?
